

## PROTECT YOUR INVESTMENT

### YOUR PRODUCT

### WARRANTY & CARE GUIDELINES

Please note: The information below is general in nature, for more specific information on your floor, please refer details above. Furthermore, there is some useful information can be found at [www.atfa.com.au](http://www.atfa.com.au)

## FLOOR CARE AND MAINTENANCE

- Place felt pads under all furniture.
- When moving furniture, try to lift objects rather than pushing or pulling over the floor surface.
- Timber floors will darken with exposure to light. Move rugs/furniture occasionally to avoid patches of different colour. All flooring will fade when exposed to direct sunlight.
- All floors will move with the changes in season, this is normal.
- Regular vacuuming or sweeping with a soft broom is the easiest way to keep your floor looking beautiful. Please ensure vacuum head has no protruding sharp edges.
- Never wet or saturate a timber floor directly. Use a well wrung out mop head and an approved timber floor cleaner.
- Stiletto or high heels shoes will damage your floors.
- Place mat at all exterior doorways, inside and out. It is also advised to place mats near sinks and stoves.
- Be aware that dirt and sand are abrasive and can be harmful to your floors. Remove dirt and spills promptly.
- Try to keep all blinds and curtains closed during especially hot days (*Handy hint!* Tinted windows can help prevent damage from the sun's powerful rays).
- Maintain suitable temperature and humidity levels all year round in your home. The use of a dehumidifier and humidifier are advised to prevent high/low levels of humidity.
- Identify any loose appliance fittings or water leaks. These can be potential hazards to the life of your flooring.
- Ensure your new flooring is covered in your home insurance under accidental damage (accidents do happen).

**Remember - protect your investment, and keep your floors looking beautiful!**

Yours Sincerely,

Russell | OWNER
